Introduction

This Implementation Plan is a critical platform to deliver the Clare Local Economic and Community Plan 2024-2030 (LECP). This implementation Plan covers the 2 years 2024 to 2026. It will be followed by further Implementation Plans covering the years 2026 to 2028 and 2028 to 2030 respectively. Each Implementation Plan will, in accordance with the LECP guidelines, be subject to on-going monitoring by the Advisory Steering Group of the Local Community Development Committee and the Economic Development Strategic Policy Committee of Clare County Council.

The 2024-2026 Implementation Plan which follows, sets out the key strategic actions required to advance delivery of the high-level goals and underpinning objectives set out in the LECP. In accordance with the provisions of the LECP, the focus of the strategic actions will be to address critical social, economic, cultural and sustainability gaps across the County and, through inter agency collaboration to seek to deliver tangible improvements in the quality of local public services and as a consequence, the quality of life for the people of Clare across all age groups, identities and geographic locations.

In this Implementation Plan each High-Level Goal and their objectives, an action has been identified to be implemented from 2024-2026. There are other actions which have been identified through the LECP process which will be addressed in future implementation plans. In addition, the LCDC and ESPC will have regard to the forthcoming corporate priorities of both Municipal Districts and the Council in the aftermath of the Local Government Elections and will review High Level Goals, Objectives and Actions in the context of the current review of the National Planning Framework and underpinning National Development Plan. These are expected to be available during Summer 2024 as well as a new Programme for Government, expected in the period Autumn 2024 to late Spring 2025, i.e. during the period of this Implementation Plan.

Future changes to the local and national policy arena may also influence local priorities which are under the mandate of the LECP and consequently the LCDC and ESPC will have a wider role in monitoring and oversight of changes to local socio-economic conditions and to shifts in other policy arena impacting the member organisations and agencies of both Committees. The implementation actions following are set out having regard to the UN Sustainable Development Goals, current national and regional policy and most critically the priorities of the LECP Framework Document as informed by public consultation.

Plan Implementation and Monitoring

The National LECP Guidelines 2021 championed a new approach to the development of Local Economic and Community Plans based on feedback and consultation on the learnings from the last LECP Process with specific references to the challenges presented by recent world events such as the Covid Pandemic, the Ukrainian Crisis, and our ability to respond and react at local level. This new approach will facilitate a more agile and flexible delivery of initiatives and programmes that will support the attainment of the high-level goal themes and the achievement of the objectives outlined in this framework document. The continuous evaluation and 2-year review will ensure focus on delivery of the high-level goals and objectives through specific targeted actions based on existing and emerging programmes and policies to be embedded into each implementation plan over the six-year period.

Consequently, the LECP consists of two key elements:

1. The development of an overall LECP framework detailing the high-level goals and sustainable community and economic objectives, which sets out the key strategic priorities for County Clare for the 6-year LECP period.
2. Three two-year implementation plans to deliver on the LECP Framework document covering the 6-year period. Each implementation plan will detail the inputs, actions and resources required at local level to secure the operational delivery of the strategic aims of the LECP Framework as well as relevant key performance indicators to facilitate evaluation.

6.1 Implementation

The initial 2-year LECP Implementation Plan has been published alongside this final LECP Framework document and includes inputs from the LECP Advisory Steering Group, agencies, service providers, LCDC Members and Economic SPC Members. The current (and future) Implementation Plan has been (and will be) developed through an iterative process, designed to identify clear actions that can directly contribute to the achievement of the 6 High-Level Goals and 36 Objectives contained in this Framework document. The collaborative process applied to the development of the implementation plan will ensure due consideration of the current and projected resources (both human and financial) available to implement the strategic actions, that are led by a range of relevant local stakeholders. Consequently, responsibility for the implementation of each strategic action has been assigned to a Lead Agency and it is expected that the Lead Agency will:

- 
1. Coordinate the activity of other collaborators.
 2. Allocate sufficient and appropriate resources and
 3. Report as required on delivery/ progress to the LCDC or Economic SPC on the implementation of the assigned action. Agencies and organisations identified as collaborators are expected to support and assist the Lead Agency on the implementation of the action.

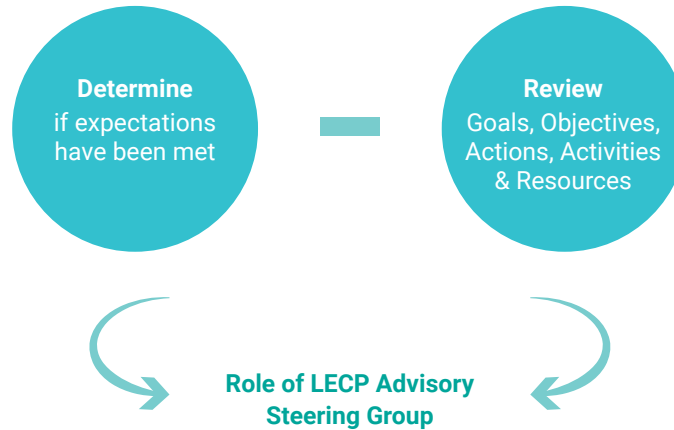

Target Groups/Beneficiaries have been identified against each action together with key performance indicators, designed to measure performance and the extent to which the action has been implemented.

6.2 Monitoring and Evaluation

This LECP Framework will be implemented over the period 2024 to 2030 through three two-year implementation plans. The first two-year implementation has been published alongside the Framework document. While some of the strategic actions included will be completed within the first two years, others will be ongoing with their implementation spanning the lifetime of the framework. Additional actions will be added in future iterations of implementation plans, reflecting the ability of the LECP to respond to emerging needs and an ever-changing socio-economic environment.

Lead Agencies will be required to report on action progress through the existing LCDC and Economic SPC structures based on the focused outcome (i.e. economic or community) of the strategic action. In terms of oversight and monitoring the LECP advisory Steering Group will be retained as the reporting structure to coordinate and report on the implementation plan to the LCDC and Economic SPC. This will support the integrated approach required to drive the delivery of the LECP. Lead Agencies will therefore be required to report to the LECP Advisory Steering Group twice a year using the identified KPI's for each action with the Advisory Steering Group tasked to provide two six monthly progress reports to the LCDC and Economic SPC.

As specified in the LECP Guidelines 2021, there is a requirement for case study collection to be part of the monitoring of the Framework and Implementation Plans. The LECP Advisory Steering Group will therefore work with Lead Agency to compile a case study for two or more of the High-Level Goals each year (with all 6 Goals to be the subject of a case study during the lifetime of the plan). This qualitative data will further inform and complement the quantitative Key Performance Indicators as part of the overall monitoring and evaluation of the LECP Framework.
